

From the Publisher:

Creative play has always been important at Dalmatian Press. By encouraging creativity—through artwork, music, or imagining other worlds—we help children to become the unique people they are meant to be.

Several new products this spring were designed to spark the creativity of Dalmatian readers. *Scratch and Doodle* books offer sturdy holographic foil and swirl pattern scratch-offs, as well as coloring and activity pages—geared to both boys and girls!—with room to color, draw, or just doodle with a special mini marker.

And for aspiring artists interested in animal friends, Dalmatian has produced a new *Learn to Draw Animals kit*, complete with sketch pad, colored pencils and markers, step-by-step instructions, and a binder with touch fastener for easy storage.

Carl Sagan believed that the imagination can “carry us to worlds that never were.” And Dalmatian is proud to offer color and activity sets to help transport children back into the most popular space fantasy series of all time: *Star Wars: The Clone Wars*. Jedi Knights and spectacular star galaxy clones and villains will come to life in Dalmatian products based on the 3D CGI animated movie scheduled for release on Aug. 15, 2008, and a CGI television series to be broadcast over Cartoon Network and TNT in September.

May the force be with you ...
